

If the EFF, the Electronic Privacy Information Center, and the ACLU (who started a letter drive opposed to this as well) weren't enough for you then maybe this will help reinforce that what you are doing is wrong. DO NOT wiretap, snoop, and collect our personal communications; whether they be via VOIP, Internet Telephony, Instant Message Voice Chats, telephone calls, in person at my front door... When will it stop? A lot of good living in a free country does you if you can't be free to express yourself without some person, some organization, some agency, or other various form of perverted, creepy behaving entity listening in, accusing and assuming that you are doing something wrong. This just adds to the pile of crap coming from DC to make this more of a police state and less of a place we citizens want to live. I am no longer proud of my country, my country is a lost child.
